

SUNON®

Modern HVLS Fan

The Simplicity of Breeze

With the Earth's axis tilted at 23.5°, it created the beautiful sceneries of the 4 seasons. With the 31° curvilinear design of the SUNON Modern HVLS Fan airfoil, it creates not only a massive airflow, but also an ultra silent operation. The 6 speed rotation ensured you a silent natural breeze, the unique airfoil gently running through the air revitalizing your space with a rustic breeze.

■ Curvilinear Aesthetic Airfoil Design

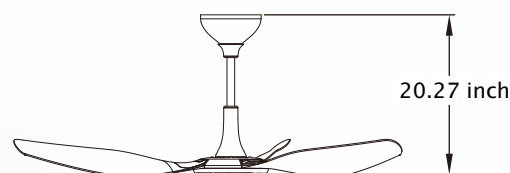

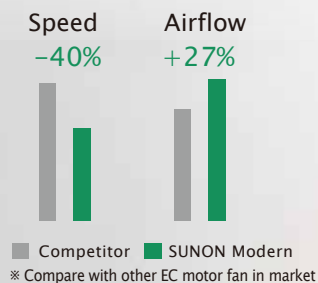

Modern HVLS Fan distributes large amounts of smooth and quiet air at extremely low speed.

■ Enjoy the Ultra Silence

Compared with the regular AC or DC motor, our motor is more silent, aerodynamic design airfoil fan blade makes the airflow smoother and reduces air noise effectively. It perfectly fits commercial space like a cafe, showroom, office, etc. Experience quiet enjoyment without interference.

■ High-Efficiency BLDC Motor

Modern HVLS Fan features a direct-drive BLDC motor which can generate double torque. The motor efficiency can be over 90%, it replaces the high energy consumption air conditioner cost for long-term use in light commercial space.

Specification

Diameter	60inch (150cm)
Motor	BLDC motor
Material	ABS
Rated Voltage	100~120V or 220~240V
Power Consumption	5W~50W
Speed	50~120RPM
Max. Airflow	18,615 m ³ /h 10,950 CFM
Fan Control	6 Speed (FWD./ REV.) Remote Control

Suitable Area: exhibition, bookstore, coffee shop, library, museum, office, conference room, hotel lobby, hospital, gym and residential.
